overpasses, spurs, etc.
- ✓ Utility construction
- ✓ Signal construction

Contact us to learn more  
about our project solutions  
and how we can assist you.

## Construction Management - The Right Way

The Field Services Team has been building track for decades. We understand the specific issues associated with construction adjacent to live track. We can make sure a project gets done safely.

We work extensively with railroad staff, contractors, and third party agencies/contractors to build strong working relationships. This allows us to communicate proactively and allows the team to identify and mitigate potential issues together.

Our construction management services include providing construction managers, resident engineers, office engineers, schedulers, inspectors, safety officers, and administrative staff. Our team can develop plans and schedules that maximize both the operating use of the track and the available construction time.

## It's our business to know Rail

With decades of first hand railroad experience, RailPros' staff includes top railroad industry talent who bring diverse and comprehensive professional expertise including construction management, track design, track inspection, project management, utilities permitting, Roadway Workers in Charge (RWICs) and railroad coordination.

Our nationwide team of experts provides the full spectrum of railroad project services, saving clients time and money.
